NHS Continuing Healthcare Checklist

July 2022

Published May 2022

What is the Checklist and why is it used?

1. The Checklist is a screening tool which can be used in a variety of settings to help practitioners identify individuals who may need a referral for a full assessment of eligibility for NHS Continuing Healthcare.
2. All staff who complete the Checklist should be familiar with the principles of the National Framework for Continuing Healthcare and NHS-funded Nursing Care and also be familiar with the Decision Support Tool for NHS Continuing Healthcare.
3. The Checklist threshold at this stage of the process has intentionally been set low, in order to ensure that all those who require a full assessment of eligibility for NHS Continuing Healthcare have this opportunity. Practitioners should advise those for whom the Checklist is completed that a positive checklist does not automatically lead to eligibility for CHC, and only indicates that the individual requires a full assessment for NHS Continuing Healthcare.
4. There are two potential outcomes following completion of the Checklist:
 - a **negative** Checklist, meaning the individual does not require a full assessment of eligibility and they are not eligible for NHS Continuing Healthcare; or
 - a **positive** Checklist meaning an individual now requires a full assessment of eligibility for NHS Continuing Healthcare. It does not necessarily mean the individual is eligible for NHS Continuing Healthcare.

Note:

All these tools are available electronically (as Word documents) and pages or boxes can be expanded as necessary.

It is important to note that these are national tools and the content should not be changed, added to or abbreviated in any way. However, ICBs may attach their logo and additional patient identification details if necessary (e.g. adding NHS number, etc.).

When should the Checklist be completed?

5. Where there may be need for NHS Continuing Healthcare, the Checklist should normally be completed.
6. There will be many situations where it is not necessary to complete the Checklist. See paragraph 121 of the National Framework and page 9 below.
7. Screening and assessment of eligibility for NHS Continuing Healthcare should be at the right time and location for the individual and when the individual's ongoing needs are clearer. This may be in a variety of settings, although the full assessment of eligibility should normally take place when the individual is in a community setting, preferably their own home. The core underlying principle is that individuals should be supported to access and follow the process that is most suitable for their current and ongoing needs. This will help practitioners to correctly identify individuals who require a full assessment of eligibility for NHS Continuing Healthcare.
8. To understand how NHS Continuing Healthcare interacts with hospital discharge, please refer to paragraphs 101-108 of the National Framework.

Who can complete the Checklist?

9. The Checklist can be completed by a variety of health and social care practitioners, so as long as they have been trained in its use.

What is the role of the individual in the screening process?

10. The individual should be given reasonable notice of the intention to undertake the Checklist and have the process explained to them. They should normally be given the opportunity to participate actively in the completion of the Checklist, together with any representative they may have, so that they can contribute their views about their needs.
11. There are a number of principles which underpin the NHS Continuing Healthcare process: most importantly that assessments and reviews should always focus on the individual's needs and follow a person-centred approach. The individual should be fully informed and empowered to participate actively in the assessment process and any subsequent reviews, and their views should be considered. In addition, there are a number of legal requirements when it comes to an individual's consent for parts of the NHS Continuing Healthcare process.
12. In the spirit of the person-centred approach, practitioners should make all reasonable efforts to seek the participation of the individual (or their representative) for the assessment and review process for NHS Continuing Healthcare, during each stage of the process. For a

comprehensive assessment, the best evidence available at the relevant time should be considered. This should involve consideration of the individual's (or their representative's) view, and they should be empowered and assisted to participate. Throughout the process, this person-centred approach should be embedded in all decisions which relate to the individual's needs assessment, and their care planning.

13. Consent is a legal requirement for any physical intervention on, or examination of, a person with capacity to give consent. To the extent that screening for NHS Continuing Healthcare involves such an intervention or examination, informed consent must be sought from an individual with capacity to give consent. Please refer to paragraph 85 of the [National Framework](#) which gives detailed guidance on what is required for consent to be valid.
14. It is necessary to obtain an individual's explicit consent before sharing any personal data with a third party such as a family member, friend, advocate, and/or other representative.
15. However, it is not necessary to seek consent from an individual in order to share their personal data as part of their NHS Continuing Healthcare assessment (and subsequent reviews) between health and social care professionals.
16. If there is a concern that the individual may not have capacity to give consent to a physical intervention/examination that is part of the assessment process, or to the sharing of personal data with third parties such as a family member, friend, advocate, and/or other representative, this should be determined in accordance with the Mental Capacity Act 2005 and the associated code of practice. It may be necessary for a 'best interests' decision to be made, bearing in mind the expectation that everyone who is potentially eligible for NHS Continuing Healthcare should have the opportunity to be considered for eligibility. Guidance on the application of the Mental Capacity Act 2005 in such situations is provided in paragraphs 86-96 of the National Framework.

How should the Checklist be completed?

17. Completion of the Checklist is intended to be relatively quick and straightforward. It is not necessary to provide additional detailed evidence along with the completed Checklist.
18. Practitioners should compare the domain descriptors to the needs of the individual and select level A, B or C, as appropriate, choosing whichever most closely matches the individual. If the needs of the individual are the same or greater than anything in the A column, then 'A' should be selected. Practitioners should briefly summarise the individual's needs which support the level chosen, recording references to evidence as appropriate.
19. A full assessment for NHS Continuing Healthcare is required if there are:
 - two or more domains selected in column A;
 - five or more domains selected in column B, or one selected in A and four in B; or

- one domain selected in column A in one of the boxes marked with an asterisk (i.e. those domains that carry a priority level in the Decision Support Tool), with any number of selections in the other two columns.
20. There may very occasionally be circumstances where a full assessment of eligibility for NHS Continuing Healthcare is appropriate even though the individual does not apparently meet the indicated threshold as set out above. A clear rationale must be given in such circumstances and local protocols followed.
21. The principles in relation to ‘well-managed need’ (outlined in the Assessment of Eligibility section of the National Framework, paragraphs 162-166) apply equally to the completion of the Checklist as they do to the Decision Support Tool.

What happens after the Checklist?

22. Whatever the outcome of the Checklist – whether or not a referral for a full assessment of eligibility for NHS Continuing Healthcare is considered necessary – the outcome must be communicated clearly and in writing to the individual or their representative, as soon as is reasonably practicable. This should include the reasons why the Checklist outcome was reached. Normally this will be achieved by providing a copy of the Checklist.

What happens following a negative Checklist?

23. A negative Checklist means the individual does not require a full assessment of eligibility and they are not eligible for NHS Continuing Healthcare.
24. Where it can reasonably be anticipated that the individual’s needs are likely to increase in the next three months (e.g. because of an expected deterioration in their condition), this should be recorded and a decision made as to whether the checklist should be reviewed within a specified period of time.
25. If an individual has been screened out following completion of the Checklist, they may ask the ICB to reconsider the Checklist outcome. The ICB should give this request due consideration, taking account all of the information available, and/or including additional information from the individual or carer, though there is no obligation for the ICB to undertake a further Checklist.

What happens following a positive Checklist?

26. A positive Checklist means that the individual requires a full assessment of eligibility for NHS Continuing Healthcare. It does not necessarily mean that the individual will be found eligible for NHS Continuing Healthcare (refer to paragraphs 134-137 of the National Framework).

NHS Continuing Healthcare Checklist (July 2022)

27. An individual should not be left without appropriate support while they await the outcome of the assessment and decision-making process.

NHS Continuing Healthcare Needs Checklist

Date of completion of Checklist _____

Name	<input type="text"/>	DOB	<input type="text"/>
------	----------------------	-----	----------------------

NHS number and GP/Practice:

Permanent address and telephone number	Current location (if different from permanent address)
<input type="text"/>	<input type="text"/>

Gender _____

Please ensure that the equality monitoring form at the end of the Checklist is completed

Was the individual involved in the completion of the Checklist? Yes/No (please delete as appropriate)

Was the individual offered the opportunity to have a representative such as a family member or other advocate present when the Checklist was completed? Yes/No (please delete as appropriate)

If yes, did the representative attend the completion of the Checklist? Yes/No (please delete as appropriate)

Please give the contact details of the representative (name, address and telephone number).

Did you explain to the individual how their personal data will be shared with the different organisations involved in their care? Yes/No (please delete as appropriate)

Continued overleaf

NHS Continuing Healthcare Checklist (July 2022)

Did you explain to the individual how their personal data will be shared with other third parties, such as a family member, friend, advocate and/or other representative? This consent should be recorded in writing, and ideally identify the individuals with whom the data can be shared (e.g. on the Consent form). Yes/No (please delete as appropriate)

When not to screen

There will be many situations where it is not necessary to complete the Checklist. Practitioners should review the statements below on when it may not be appropriate to screen for NHS Continuing Healthcare before they start the process of completing the Checklist.

The situations where it is not necessary to complete the Checklist include:

- (a) It is clear to practitioners working in the health and care system that there is no need for NHS Continuing Healthcare at this point in time. Where appropriate/relevant this decision and its reasons should be recorded. If there is doubt between practitioners, the Checklist should be undertaken.
- (b) The individual has short-term health care needs or is recovering from a temporary condition and has not yet reached their optimum potential (although if there is doubt between practitioners about the short-term nature of the needs it may be necessary to complete the Checklist). See paragraphs 101-108 of the National Framework for how NHS Continuing Healthcare may interact with hospital discharge.
- (c) It has been agreed by the ICB that the individual should be referred directly for full assessment of eligibility for NHS Continuing Healthcare.
- (d) The individual has a rapidly deteriorating condition and may be entering a terminal phase – in these situations the Fast Track Pathway Tool should be used instead of the Checklist.
- (e) An individual is receiving services under Section 117 of the Mental Health Act that are meeting all of their assessed needs.
- (f) It has previously been decided that the individual is not eligible for NHS Continuing Healthcare and it is clear that there has been no change in needs.

If upon review of these statements, it is deemed that it is not necessary to screen for NHS Continuing Healthcare at this time, the decision not to complete the Checklist and its reasons should be clearly recorded in the patient's notes.

Name of individual		Date of completion	
	C	B	A
Breathing*	<p>Normal breathing, no issues with shortness of breath.</p> <p>OR</p> <p>Shortness of breath or a condition, which may require the use of inhalers or a nebuliser and has no impact on daily living activities.</p> <p>OR</p> <p>Episodes of breathlessness that readily respond to management and have no impact on daily living activities.</p>	<p>Shortness of breath or a condition, which may require the use of inhalers or a nebuliser and limit some daily living activities.</p> <p>OR</p> <p>Episodes of breathlessness that do not consistently respond to management and limit some daily activities.</p> <p>OR</p> <p>Requires any of the following:</p> <ul style="list-style-type: none"> - low level oxygen therapy (24%); - room air ventilators via a facial or nasal mask; - other therapeutic appliances to maintain airflow where individual can still spontaneously breathe e.g. CPAP (Continuous Positive Airways Pressure) to manage obstructive apnoea during sleep. 	<p>Is able to breathe independently through a tracheotomy that they can manage themselves, or with the support of carers or care workers.</p> <p>OR</p> <p>Breathlessness due to a condition which is not responding to therapeutic treatment and limits all daily living activities.</p> <p>OR</p> <p>A condition that requires management by a non-invasive device to both stimulate and maintain breathing (non-invasive positive airway pressure, or non-invasive ventilation)</p>
Brief description of need and source of evidence to support the chosen level			<p>Write A, B or C below:</p> <div style="border: 1px solid black; width: 40px; height: 40px; margin: 0 auto;"></div>

Drug therapies and medication: symptom control*	<p>Symptoms are managed effectively and without any problems, and medication is not resulting in any unmanageable side-effects.</p> <p>OR</p> <p>Requires supervision/administration of and/or prompting with medication but shows compliance with medication regime.</p> <p>OR</p> <p>Mild pain that is predictable and/or is associated with certain activities of daily living; pain and other symptoms do not have an impact on the provision of care.</p>	<p>Requires the administration of medication (by a registered nurse, carer or care worker) due to:</p> <ul style="list-style-type: none"> – non-compliance, or – type of medication (for example insulin); or – route of medication (for example PEG). <p>OR</p> <p>Moderate pain which follows a predictable pattern; or other symptoms which are having a moderate effect on other domains or on the provision of care.</p>	<p>Requires administration and monitoring of medication regime by a registered nurse, carer or care worker specifically trained for this task because there are risks associated with the potential fluctuation of the medical condition or mental state, or risks regarding the effectiveness of the medication or the potential nature or severity of side-effects. However, with such monitoring the condition is usually non-problematic to manage.</p> <p>OR</p> <p>Moderate pain or other symptoms which is/are having a significant effect on other domains or on the provision of care.</p>	
Brief description of need and source of evidence to support the chosen level				<p>Write A, B or C below:</p> <div style="border: 1px solid black; width: 40px; height: 40px; margin: 10px auto;"></div>

NHS Continuing Healthcare Checklist (July 2022)

Name of individual		Date of completion	
	C	B	A
Altered states of consciousness*	No evidence of altered states of consciousness (ASC). OR History of ASC but effectively managed and there is a low risk of harm.	Occasional (monthly or less frequently) episodes of ASC that require the supervision of a carer or care worker to minimise the risk of harm.	Frequent episodes of ASC that require the supervision of a carer or care worker to minimise the risk of harm. OR Occasional ASCs that require skilled intervention to reduce the risk of harm.
Brief description of need and source of evidence to support the chosen level			
			Write A, B or C below: <div style="border: 1px solid black; width: 50px; height: 50px; margin: 0 auto;"></div>
Total from all pages			

Please highlight the outcome indicated by the Checklist:

1. Referral for full assessment for NHS Continuing Healthcare is necessary (known as a positive Checklist).

Or

2. No referral for full assessment for NHS Continuing Healthcare is necessary (known as a negative Checklist).

About you — equality monitoring

We collect equalities information to meet our duties under the Equality Act 2010 and develop our insights into CHC patients and ensure we provide appropriate care. The categories included in the questions may not be exhaustive or reflect how you feel or identify. We will be reviewing these to align with approaches across Government. Filling these in is optional, and you do not have to provide an answer if you do not wish to do so.

Please provide us with some information about yourself. We collect information to help us understand whether people are receiving fair and equal access to NHS Continuing Healthcare (CHC) via the [NHS CHC Patient Level Data Set \(PLDS\)](#) which is used to help achieve better patient outcomes, better experiences and better use of resources in CHC. The lawful basis for collecting this information is Article 6 (1) (c) of the GDPR enacted by the Data Protection Act 2018. Please note that NHS CHC PLDS data is pseudonymised for analysis purposes. This means that identifiers such as names, NHS numbers and dates of birth are removed. Detailed information about the use of individual's identifiable data is publicly available at <https://digital.nhs.uk/about-nhs-digital/our-work/keeping-patient-data-safe/gdpr/gdpr-register>
